

ZACODE ERP

Occupational Health & Safety Management System

An integrated digital platform to manage safety inside garment factories — protecting workers and ensuring full compliance.

A specialized module within Zacode ERP that connects incidents, risks, inspections, protective equipment, training and emergencies in a single system — giving the safety department real-time visibility and a precise dashboard to take preventive decisions before any hazard occurs.

Introduction & Overview

An integrated vision for occupational-safety management

We are pleased to present to the Occupational Health & Safety department of **Alex Apparels** a specialized module within the **Zacode ERP** system, designed to fully manage the safety ecosystem inside garment factories — from logging incidents and assessing risks, to managing protective equipment, training, emergencies and compliance with local and international standards.

The module operates in connection with the rest of the factory's departments (production, warehouses, human resources), linking every worker, every production line and every machine to its own safety record, and transforming safety procedures from scattered paperwork into a unified, measurable and real-time digital system.

Injury Frequency Rate (LTIFR)

Reported Near-Misses

Lost Work Days

Corrective-Action Closure Rate

Scope of the Safety Module

A comprehensive system covering every aspect of safety

- ✓ Log and track incidents, injuries and near-misses
- ✓ End-to-end management of the PPE lifecycle
- ✓ Training, certification and emergency-plan management
- ✓ A full hazard register per department, line and machine
- ✓ Inspection rounds and periodic checklists
- ✓ A real-time safety dashboard for top management

Incidents, Injuries & Reports

- ✓ Log incidents, injuries and near-misses (Near-Miss)
- ✓ Classify each incident by type, severity and location
- ✓ Investigate and analyze the root cause of each incident
- ✓ Track lost work days and compensation

Risk Assessment & Hazard Register

- ✓ Hazard register per department, line and machine
- ✓ Risk-level scoring (likelihood × impact)
- ✓ Risk-control and mitigation plans to an acceptable level
- ✓ Periodic review and continuous register updates

Personal Protective Equipment (PPE)

- ✓ Issue equipment per worker by size and task
- ✓ Track equipment validity and replacement dates
- ✓ Link issuance to inventory and cost
- ✓ PPE-compliance reports

Inspections & Work Permits

- ✓ Periodic inspection rounds with checklists
- ✓ Permit to Work for hazardous tasks
- ✓ Capture and document violations with photos
- ✓ Automatic scheduling of periodic inspections

Corrective & Preventive Actions (CAPA)

- ✓ Open a corrective action for every violation or incident
- ✓ Assign an owner and due date to each action
- ✓ Track action status through to final closure
- ✓ Automatic alerts for overdue actions

Machine Safety Maintenance

- ✓ A safety card for every machine and piece of equipment
- ✓ Scheduling of periodic preventive maintenance
- ✓ Link breakdowns to safety hazards
- ✓ Prevent operation of unsafe machines

Training, Emergency & Occupational Health

Full readiness and continuous worker protection

Training & Certifications

- ✓ A safety-training record for each worker
- ✓ Track certifications and their renewal dates
- ✓ Alerts before certifications expire
- ✓ Assess training comprehension

Emergency, Evacuation & Fire

- ✓ Evacuation plans and assembly-point definition
- ✓ Schedule periodic fire and evacuation drills
- ✓ Track firefighting equipment and its validity
- ✓ Document drill results and lessons learned

Chemical Management (MSDS)

- ✓ Register of chemicals used (dyeing / printing)
- ✓ Safety data sheets (MSDS) for each material
- ✓ Safe storage and handling requirements
- ✓ Track stock and expiry dates

Occupational Health & Medical Exams

- ✓ Record of periodic medical examinations for workers
- ✓ Track occupational illnesses and special cases
- ✓ Link the work environment to health hazards
- ✓ Alerts for periodic-examination dates

Compliance & International Standards

Full adherence to laws and standards

Local Compliance — Egyptian Labor Law

- ◆ Adherence to occupational health & safety requirements
- ◆ Work-environment requirements and safe working hours
- ◆ Safety records required by regulatory authorities
- ◆ Reports ready for government inspection

International Standards — ISO 45001

- ◆ Build a safety-management system per ISO 45001
- ◆ The continuous-improvement cycle (Plan-Do-Check-Act)
- ◆ Structured documentation of procedures and policies
- ◆ Full readiness for audit and accreditation requirements

4

Benefits of Implementation

A direct impact on the work environment and production

- ✓ Reduce incident and injury rates
- ✓ Reduce lost work days and costs
- ✓ Real-time visibility of all factory hazards
- ✓ Unify safety records in a single system
- ✓ Protect workers and strengthen the safety culture
- ✓ Full legal compliance and avoidance of fines
- ✓ Fast response to incidents and violations
- ✓ Permanent readiness for audit and accreditation

Implementation & Training Plan

A smooth launch within weeks

1

Study & Analysis of the Work Environment

Survey hazards, departments and machines and prepare the initial hazard register.

Week 1–2

2

Configuration & Setup

Configure checklists, incident types, protective equipment and permissions.

Week 2–3

3

Data Entry & Pilot Run

Enter current safety records and run a pilot to verify the accuracy of the system.

Week 3–4

4

Safety-Team Training

Hands-on training for the safety department and supervisors on using the full module.

Week 4

5

Go-Live & Continuous Support

Official launch with direct technical support, periodic follow-up and continuous updates.

Ongoing

Free Trial

Try the module before you decide

Special Offer

A full-featured one-month free version

We are pleased to offer a full-featured trial version to test the safety module on real factory data, with technical support throughout the trial period.

We look forward to cooperating with you and presenting a practical demonstration of the occupational health & safety module, showing how **Zacode ERP** helps build a safe work environment, protect workers, and achieve full compliance with local and international safety standards.

With sincere appreciation — The Zacode ERP Team
