

ZACODE ERP

Technical Proposal for the Garment Manufacturing Management System

An integrated operations platform connecting production, inventory, sales, exports, quality and accounting in one system.

A system purpose-built for garment & textile factories serving both local and export markets — ensuring full control over the operating cycle, raising efficiency, reducing waste, and giving management accurate, real-time insight for decision-making.

Integrated Technical Proposal

Introduction

An integrated vision for factory operations

To the Esteemed Chairman of the Board of **Alex Apparels**, we are pleased to present the integrated **Zacode ERP** system for managing and operating garment & textile factories serving local and export markets — designed to connect all factory departments in a single platform that ensures full control, raises operational efficiency, reduces costs, and improves the quality of decision-making.

The system provides comprehensive management of every operational and administrative process inside the factory — from raw-material procurement through to delivering the finished product to customers inside Egypt and abroad, including the Gulf and other export markets.

Manufacturing & Production

From raw material to finished product

Work Orders & Styles

- ✓ Manage production orders and manufacturing stages step by step
- ✓ Manage styles and bills of materials (BOM)
- ✓ Calculate the actual production cost per order
- ✓ Production-line efficiency reports

Lot Tracking & Quality

- ✓ Manage production by lot number (Lot / Batch)
- ✓ Track fabrics and accessories used in each run
- ✓ Monitor waste and scrap in real time
- ✓ Full product traceability from raw material to delivery

Warehouse Management

Precise control over balances and sizes

Inventory & Balances

- ✓ Multi-warehouse and multi-branch management
- ✓ Track raw-material and finished-goods balances
- ✓ Minimum-stock alerts
- ✓ Full item-movement tracking

Sizes, Colors & Stocktaking

- ✓ Manage items by size/color matrix (Matrix)
- ✓ Periodic and surprise stocktakes
- ✓ Barcode and QR Code management
- ✓ Link stock movement to production and sales orders

3

Sales & Distribution

From quotation to collection

Sales Cycle

- ✓ Quotations, sales orders and invoices
- ✓ Customer management and sales-rep follow-up
- ✓ Supply and distribution contract management

Sales Analytics

- ✓ Analysis by customer, region or product
- ✓ Manage sales inside and outside Egypt
- ✓ Rep and region performance indicators

4

Procurement

Cost control and supplier evaluation

Purchase Cycle

- ✓ Purchase requests and supplier approval
- ✓ Track supplies and compare quotations

Cost & Performance

- ✓ Monitor purchasing costs
- ✓ Periodic supplier-performance evaluation

5

Finance & Accounting

Automated entries and instant reports

Core Accounting

- ✓ Integrated chart of accounts and automated journal entries
- ✓ Customer and supplier accounts
- ✓ Cash, banks and cost-center management

Financial Statements

- ✓ Balance sheet and profit-and-loss statement
- ✓ Cash flows
- ✓ Instant financial reports for top management

6

Exports & International Trade

Full support for export operations

Shipping & Documents

- ✓ Manage export orders and their documentation
- ✓ Track containers and shipments
- ✓ Follow sea and land freight

Markets & Costs

- ✓ Sales reports by country
- ✓ Follow customers inside and outside Egypt
- ✓ Manage export and shipping costs

7

Integrated Production-Line Tracking

Monitor every stage in real time inside the system

Complete real-time monitoring of all production lines and their stages

- ✓ Status of each production line in real time (running / stopped)
- ✓ Track the stages: cutting, sewing, finishing, ironing, packing
- ✓ Quantities produced at each stage and on each line
- ✓ Completion rates against plan for each work order
- ✓ Cycle Time and productivity per line
- ✓ Detect bottlenecks, stoppages and their causes
- ✓ Defect and rework tracking at every stage
- ✓ Line-performance dashboards directly inside the ERP

Occupational Health & Safety

A safe work environment with full standards compliance

An integrated module for managing occupational health & safety inside the factory — connecting incidents, risks, inspections, protective equipment and training in a single system, giving the safety department real-time visibility and a precise dashboard to take preventive decisions before any hazard occurs.

Injury Frequency Rate (LTIFR)

Reported Near-Misses

Lost Work Days

Corrective-Action Closure Rate

Incidents, Injuries & Reports

- ✓ Log incidents, injuries and near-misses (Near-Miss)
- ✓ Investigate and analyze the root cause of each incident
- ✓ Track lost work days and compensation
- ✓ Instant alerts to management when an incident occurs

Risk Assessment & Hazard Register

- ✓ Hazard register per department, line and machine
- ✓ Risk-level scoring (likelihood × impact)
- ✓ Risk-control and mitigation plans to an acceptable level
- ✓ Periodic review and continuous register updates

Personal Protective Equipment (PPE)

- ✓ Issue equipment per worker by size and task
- ✓ Track equipment validity and replacement dates
- ✓ Link issuance to inventory and cost
- ✓ PPE-compliance reports

Inspections & Corrective Actions

- ✓ Periodic inspection rounds with checklists
- ✓ Permit to Work for hazardous tasks
- ✓ Corrective & preventive actions (CAPA) with closure tracking
- ✓ Machine and equipment safety-maintenance follow-up

Training, Emergency & Compliance

Full readiness for emergencies and international standards

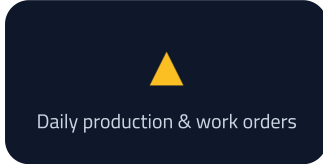

- ✓ Safety-training records, certifications and renewal dates
- ✓ Chemical management and safety data sheets (MSDS)
- ✓ Readiness for ISO 45001 safety-management requirements
- ✓ Evacuation and emergency plans with periodic fire drills
- ✓ Compliance with Egyptian Labor Law and safety regulations
- ✓ Real-time safety dashboard for top management

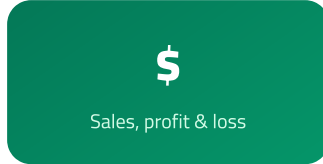

Executive Dashboard

A complete, instant view of all operations

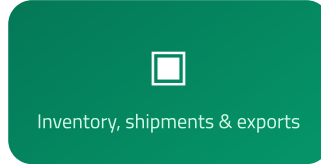

A professional dashboard presenting the full factory picture on a single screen, enabling management to monitor performance and make decisions in real time.

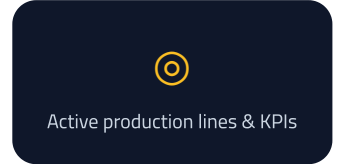

Daily production & work orders

Sales, profit & loss

Inventory, shipments & exports

Active production lines & KPIs

Tax Compliance & E-Invoicing

Ready for both the Egyptian and Gulf markets

The system supports e-invoicing requirements across more than one market, serving local sales and export simultaneously.

Egyptian Market — Electronic Invoicing (ETA)

- ◆ Issue e-invoices in the Egyptian Tax Authority format
- ◆ Item codes (GS1 / EGS) and tax linkage
- ◆ Track submission and approval status
- ◆ Value-added tax (VAT) reports

Gulf Markets — ZATCA E-Invoicing

- ◆ UBL 2.1 invoices and approved QR (TLV) code
- ◆ CSR / CSID certificate management
- ◆ Readiness for export and sales within Gulf states
- ◆ Bilingual (Arabic/English) invoice templates

Security & Permissions

Advanced data protection

- ✓ Flexible, unlimited user permissions
- ✓ Real-time user-activity monitoring
- ✓ Works over the local network or the cloud
- ✓ Full audit log of actions and changes
- ✓ Periodic backups and advanced protection
- ✓ Branch data separation and per-department permissions

Benefits of Implementation

A direct, tangible impact on operations

- ✓ Raise operating and production efficiency
- ✓ Improve inventory management
- ✓ Support export operations with high efficiency
- ✓ Reduce operating costs
- ✓ Support expansion inside and outside Egypt
- ✓ Reduce waste and loss
- ✓ Real-time monitoring of production lines and stages
- ✓ Improve the quality of decision-making
- ✓ A comprehensive view of all factory departments
- ✓ Unified data and a single source of truth

Implementation, Training & Support Plan

A smooth launch within weeks

1

Analysis & Data Preparation

Study the factory workflow; prepare the chart of accounts, warehouses, items and styles.

Week 1–2

2

Configuration & Setup

Configure branches, warehouses, permissions, invoice templates and tax linkage.

Week 2–3

3

Balance Migration & Pilot Run

Enter opening balances and run a parallel pilot to verify the accuracy of the cycle.

Week 3–4

4

User Training

Hands-on training for each department (production / warehouses / sales / procurement / accounting).

Week 4

5

Go-Live & Continuous Support

Official launch with direct technical support, periodic follow-up and continuous updates.

Ongoing

Free Trial

Try every capability before you decide

Special Offer

A full-featured one-month free version

We are pleased to offer a full-featured trial version to test all the system's capabilities on real factory data, with technical support throughout the trial period.
